

UNIT OR FORMATION NAME: **ATTSUL-1**

POINTS: **80**

DESCRIPTION: **All Terrain Troop Support Unit Level 1**

As Inquisitor Lord StenMar and Brother Captain Josias organized the Abhuman population of the lost planet Accra, they came upon a manufactorium of a vehicle similar to the ubiquitous Sentinel. Using the STC with very few modifications the All Terrain Troop Support Unit became a staple of StenMar's forces. The ATTSU's come in three main levels.

The **ATTSUL-1**, the basic design, is an anti-personnel vehicle with one pilot. It has an enclosed cockpit that provides adequate protection from small arms fire, and a variety of low-power, high-rate-of-fire weaponry.

Used occasionally as forward deployed reconnaissance units and scouts the ATTSUL-1 is more frequently used as close range fire support for infantry assault units.
