**DESCRIPTION:**

## THE MONOLITH OF RENEWAL

A very rare sight to most mortal eyes, the Monolith of Renewal is only used by the Necrons in their largest operations.

The Renewal variation of the Monolith was developed due to the limited number of Necron Lords available to wield Resurrection Orbs in massive assaults.

While it has only been seen in one engagement to this point, the increased amount and size of Necrontyr activity in this portion of the galaxy indicates the Monolith of Renewal will become a more common sight.
